The Republican believes in strictly one price for advertising, and accordingly it publishes its rates in full, and exactly as they are.

Special position ads 25 per cent. extra.

Preferred Local 10 cents per line first insertion, and 5 cents per line each subsequent insertion.

All contracts and bills for advertising payable monthly.

If you can't talk up Arizona, don't talk.

The greatest periods of depression ever known in America were during the free trade era.

The removal of the Southern Pacific's Deming shops to Los Angeles will be a big lift to the Angel city.

No country ever prospered as the United States has always done when protective tariff laws were in operation.

The Republican is the only paper in Arizona that publishes the sporting news of the world bright and fresh every day.

Continued improvement in the breeding of horses can but result in greater speed and we may yet see the runner that can cover a mile in a minute and a half.

No man who has any of the instincts of a gentleman will take advantage of his position as an editor of a paper to adopt the usual methods of personal vilification resorted to by pimps and prostitutes.

EMPEROR WILLIAM continues to demonstrate to those about him that he is Germany's sole ruler. When his ministers do not move fast enough to suit him in diplomatic matters he takes the reins into his own hands.

SATURDAY was a great day for record breaking. Five records for amateur athletes were broken at the great Inter-Collegiate meeting in New York, and Fides reduced the time for running one mile and a quarter, three-fourths of a second.

SUBSEQUENT events cause THE REPUBLICAN to believe, with General Grierson, that Robert Hardee was not killed by Indians, but by Mexicans disguised as Indians. The Republican has no love for the blood thirsty Apache, but it does not believe in this case that the Apaches had anything to do with it.

THE SUCCESS OF THE REPUBLICAN has been so great that it is causing great uneasiness among some of the small fry. If they can find any amusement in attacking THE REPUBLICAN they are welcome to it. Already it is so firmly established that "all the powers of hell shall not prevail against it."

FARM lands in many sections of the Southern States have doubled and trebled in value in the last ten years owing to the development, under protection, of the mining and manufacturing industries. Yet Senator Carlisle, of Kentucky, would have the farmers believe that protection is ruining them.

THE REPUBLICAN is deeply thankful for the welcome extended its editor, Mr. C. O. Ziegenfuss, at Tucson, as evidenced by the following from the Star:

The Star received a pleasant call yesterday from Mr. C. O. Ziegenfuss, editor and manager of THE REPUBLICAN. We were pleased to learn that our brother of the paper was a Pennsylvanian, a comrade in arms, and a thorough going newspaper man.

STEPHEN M. WHITE of Los Angeles, has come out openly and avowedly as a Democratic candidate for the United States Senate from California to succeed Senator Leland Stanford. What there is about Mr. White to especially entitle him to the support of the Democracy of the Golden State THE REPUBLICAN does not understand. He is the most over-estimated man in California.

MR. CARLISLE labors very hard to try to show that the farmers over the country are being oppressed by the protective tariff. Perhaps Mr. Carlisle can explain how it is that under protection the great mining and manufacturing interests of Alabama, Georgia, Tennessee, North Carolina, Virginia and Kentucky are being built up to the great improvement of those States and vastly enhancing the values of farm lands.

AN Eastern gentleman who owns land near Phoenix, in enclosing a draft for his subscription to the DAILY REPUBLICAN says: "A friend sent me a copy of THE REPUBLICAN. It is a fine paper and ought to be the special pride of the whole Territory. Such a paper is the best aid to immigration that the Territory can furnish. I wish you success in a substantial way as the enclosed draft will show, and I am sure such a paper will win."

## PERFECT HOMES.

The Banning, California, Herald has the following article on the future of Southern California:

Rural California is to be a new thing under the sun. Here the distinction between town and country is to be wiped out, or, rather, the definition of town is to be radically modified. The unfortunate village that was so short-sighted as to plat itself into twenty-five foot lots is doomed hereabouts. The coming and only possible town in this favored region is illustrated in Riverside. Its lots will be measured by the acre instead of by the foot. Every citizen is to be a self-supporting producer. No longer will the town depend upon the country. The ideal life—urban and rural combined—will prevail here. The hot-house, city system, whereby it is possible to rear a human being to years of maturity without removing from it the infantile fear of the most docile domestic animals, will not abide. In these aggregations of farms will obtain a home life, wholesome and highly developed. The school, two miles away, will not usurp attention as it if it were only two blocks away. Ventilating spaces between families will beget more individuality. The old system of town and country built up where it took 300 acres to make a farm, cannot prosper where ten acres constitute a farm. Southern California is destined to develop the choicest mode of existence on the continent.

It is just such homes and settlements described above as are needed in the Salt River Valley. Of course there will and must be one central city. Phoenix supplies that need. Small holdings of ten, twenty and forty acre tracts throughout the valley will insure good cultivation and a rich, prosperous and contented people.

READERS will pardon us if we make a short retrospect at the beginning of the third week of THE REPUBLICAN's life. Some of our esteemed contemporaries went so far as to even declare that THE REPUBLICAN would not live two weeks. It has not only lived past the time allotted, but it has today more than doubled the circulation of the papers which predicted for it a short life. THE REPUBLICAN was established because its owners believed there was a field in Arizona for a first-class newspaper. It has met with a reception beyond their fondest hopes. Already it is more than a success. THE REPUBLICAN will go on as it began, in a straightforward, manly way, furnishing all the news of the world, every day in the year, and trusting to win on its merits.

THE REPUBLICAN understands that to Mr. R. J. Colver, a reporter on the Los Angeles Evening Express and Los Angeles correspondent for the San Francisco Chronicle is due much of the credit for exposing the San Diego filibuster scheme in Lower California. Dick, as he is generally known, is a first-class newspaper man with a wonderful aptitude for news. He began life for himself as a page in the Kansas Legislature, nine years ago, when but fourteen years of age. In 1884 he was editor of one of the leading papers of western Kansas and gained considerable reputation as the "kid editor." Mr. Colver is an exceedingly well-informed young man, versatile and talented, and THE REPUBLICAN predicts for him great success in the newspaper profession.

THERE never can be a better time than now to urge upon the citizens of Phoenix the value of sampling works or a stamp mill for this city. There are a number of men who stand ready to pledge sums of from one hundred to five hundred dollars to start such an enterprise. That it would advance the prosperity of the city and valley is conceded. Let a public meeting be called and see what is the opinion of the people on this important question. THE REPUBLICAN will gladly devote the use of its editorial rooms for such a meeting.

MARICOPA county is big enough now. She does not want any portion of Yavapai.

## THE TERRITORY.

Episcopals of Prescott will organize a church of their denomination in that city.

Portions of Mohave county were visited by a heavy rain on Wednesday last.

A postoffice has been reestablished at Sentinel, the distributing point for the Harqua Hala camp.

A new tri-weekly stage line is to be put on between Tombstone and the Turquoise mining district.

F. G. Christie has been appointed special enumerator of the census, to collect statistics and report the number of inmates of the territorial prison.

The Tucson Militia Company have the requisite number to secure their arms and equipments. Now that enterprising city is talking of organizing a militia company to be composed of Mexicans.

Says the Star: The board of university regents have \$10,000 at their disposal for the use of experimental agricultural stations. This sum belongs to the appropriation of 1889 and will have to be expended prior to June 30 or returned to the Treasury.

The Wilcox Stockman says: "Cattle shippers, both in Arizona and New Mexico, are experiencing great inconvenience on account of the lack of cars. Mr. Black, who is well informed, says there are, between Tucson, this Territory, and Albuquerque, N. M., 20,000 cattle now being held at shipping points awaiting cars."

Speaking of life among the "noble red men," the Mohave Miner contains the following: "Wallapai Indian society, like the 'Hico,' gets badly demoralized at times, and this week it has been all torn up. Wallapai Charley got drunk and whipped his squaw so vigorously as to cause the whole Indian camp to object. Big Water, a big buck who loves the seductive fire water, added another wife to his harem, to which his favorite seriously objected, and made it lively for both by driving the new wife away and pounding her amorous lord until he begged for mercy."

Says the Prescott Journal-Miner: "Mrs. B. B. Halsey yesterday received a cablegram from her father, Col. E. N. Robinson, informing her of the latter's departure from England, at noon, on the new steamer Majestic. It is understood that during his absence Colonel Robinson has consummated the sale of the Temescal tin mines in San Bernardino county, California, and will on his return commence working them on an extensive scale. Dr. and Mrs. B. B. Halsey expect to soon leave for above camp, where the former will be engaged as physician and surgeon."

The Star of Saturday has the following: "F. C. McKinney, superintendent of the San Pedro Cattle company, is in

town. Mrs. McKinney accompanies him. He says that they have the best crop of calves in his locality that has been known for the last three years. He shipped 700 head of stock for his company two weeks ago. The farmers there are cutting their first crop of alfalfa, which is turning out very well. Rain is required to bring the second crop forward. Stock is in good condition. Mr. McKinney is from Texas and is thoroughly posted in the cattle business."

Says the Florence Enterprise, in speaking of early fruits in Arizona: "It may seem somewhat strange that the most profitable market for Arizona's fruit is in California, yet such is the fact, especially for the early fruits. Shipments of figs recently made from Yuma sold in San Francisco for 75 cents per pound and were in strong demand. The several weeks that intervene before the Arizona fruits ripen will give the Arizona fruit growers an opportunity to turn many an honest penny and at the same time gratify the ambition of the enterprising people of the Golden State who proudly exhibit them as their own productions."

The Yuma Sentinel contains the following account of the Clip shooting which occurred last Wednesday: "Deputy Sheriff Frank Burke left for the Yuma ranch on Thursday morning with a warrant for the arrest of Trinidad Gonzales, who is charged with attempt at murder. On the morning of May 28, Juan Macias, a well known stock raiser of this county, whose ranch is near Clip, remonstrated with Trinidad Gonzales about the killing of a steer belonging to the former, and informed Gonzales that if any more cattle were killed without permission, his offender would be arrested. This angered Gonzales who promptly drew his revolver and fired twice at Macias, but failed to hit him. Macias immediately dispatched a messenger to Yuma, and asked for the arrest of the shooter. Gonzales' officers, upon receiving a 'bad man,' but when he meets Deputy Burke he will be sure to quietly come down to town and face the legal music. The officer and his prisoner are expected here today."

## Wishes Us Success.

[Mohave County Miner.]

The first number of THE ARIZONA REPUBLICAN was received last week. It will be issued every day in the year. THE REPUBLICAN will, as its name indicates, be politically Republican; but in its efforts to advance the best interests of the Territory, politics will be ignored. THE REPUBLICAN receives the press reports and is brim full of local and Territorial news besides, and its typographical appearance is excellent. The Miner wishes the REPUBLICAN success.

## We Can Heartily Endorse You.

[Yuma Sentinel.]

Both East and West-bound passenger trains stop at Gila Bend presumably to enjoy breakfast, and to save people useless expenditure of money. This method is taken to warn any intending enter to abstain from attempting to satisfy his hunger at that place. The dining-room at Gila Bend, known as the Bundy House, offers its guests food, not fit for human to eat. Fifth is the principal feature of the institution and the absence of anything eatable is its notorious characteristic. This item is "straight," the writer has been there.

## NOSE AND THROAT.

Incubators of Catarrhal Bacteria.

A Disease Resulting in Weak Eyes, Deafness, Offensive Breath, Consumption and Death.

Effect of Climate, Symptoms, Prevention Treatment and Cure by Dr. MacLennan.

Among the list of chronic diseases which afflict the human frame, catarrh is the most prevalent, most offensive and most productive of discomfort, and of a great variety of distressing and dangerous complications.

The symptoms of this disease vary according to climate, each climate producing its own form of catarrh. A dry, warm climate, like that of this Territory produces a dry catarrh; while the thick, mucopurulent discharge characterizes the catarrh of cold climates.

The former, which borders on ozone, is the prevailing catarrh of the Territory. Persons may be afflicted with it for a long time before aware of its presence.

The symptoms are a dryness of the nasal passages and an irritating tickling sensation in the throat; the breath becomes offensive and dullness, with slight frontal headaches, is experienced. The person suffering from catarrh does not usually notice any particular offensiveness in his or her own breath, while to a healthy person it is disgusting. This form of catarrh is the most common cause of deafness.

Frequently nature comes to the rescue and aids the sufferer, by opening the pores of the mucous membrane of the nose and throat and irrigating the dry and parched surfaces with a secretion derived from the blood.

Now if the blood of the person is pure, nature's effort will remove the irritation and prevent catarrh; but if the blood is impure it will only make matters worse and usher in the stage of hacking. The disease then becomes copious and offensive, and if allowed to go unchecked by treatment, will extend by continuity of surface along the natural air passages to the substance of the lungs, thus causing consumption and death. In this connection it should also be remembered that the air which enters the lungs of a catarrhal patient is, every breath of it, poisoned by exhalations from the foul secretions of the diseased surface. By such air the blood cannot properly be purified and made fit to impart healthy vigor in its circulating circuit to all and every part of the animal mechanism. One would suppose that this consideration alone would be sufficient to induce every person afflicted to make early application for relief.

## TREATMENT AND CURE.

By the system of treatment which Dr. MacLennan has adopted and pursued for years with uniform success, a complete and permanent cure of this repulsive disorder can be effected. This has been demonstrated in thousands of cases, representing the disease in every form, and all its various stages of development.

His applications are made to reach the diseased parts in the most direct and positive manner. Instantaneously penetrating every cell and cavity of the head, communicating with the nostrils and subjecting every portion of the membrane to the healing action of the remedy applied with the most beneficial results, and causing the least pain or unpleasant sensation.

So effective is his plan of medication that a single application is generally productive of decided relief. The affected cavities are thoroughly cleansed from the crusts and offensive matter, the offensive smell is removed, and relief from other troublesome systems is almost immediately experienced.

The discharge soon diminishes, irritation is allayed, the inflammation subsides, ulcerations heal, the constitution is built up, the patient rapidly gains flesh, and the whole system is revitalized, and thus finally a radical cure is effected.

Dr. MacLennan can be consulted daily free of charge at the Monihan building.
